Subject index*

A

Abetalipoproteinemia, retinitis pigmentosa in, effects of vitamin A (Gouras, Carr, and Gunkel), 784

Abstracts, A.R.V.O., Atlantic Section Meeting, 157
Central section, 466
Western Section, 1000

Acetazolamide, measurements of aqueous humor in young normal subjects using (Kupfer, Gaasterland, and Ross), 523

Adenovirus and herpesvirus eye diseases, Florenal in treatment (Maichuk), 408

Age-dependent changes in structure of alpha crystallin (Spector et al.), 677

Aldose reductase, lens, activators and inhibitors of (Jedziniak and Kinoshita), 357

Alkali metal cations, kinetics of, in relation to that of thallium transport (Kinsey, McLean, and Parker), 932

Alloxan-diabetic rabbits, sorbitol pathway in ciliary body in relation to accumulation of amino acids in aqueous humor of (Reddy et al.), 870

rat, uridine diphosphoglucose -glycogen glucosyltransferase activity in retina of (Meyers and Newell), 453

Amine releasers, effect on aqueous humor dynamics (Zeller et al.), 274

Amino acids, accumulation of, in aqueous humor of alloxan-diabetic rabbits, sorbitol pathway in ciliary body in relation to (Reddy et al.), 870

transport by rabbit optic nerve in vitro (Cotlier et al.), 876

Angular dependence of light scattered from rabbit corneas (Feuk and McQueen), 294

Announcements, 165, 235, 300, 373, 470, 544, 637, 810, 920, 1009

Anterior segment chemical sympathectomy by 6-hydroxy-dopamine, effect on intraocular pressure and outflow facility (Holland and Mims), 120

Antibody formation, specificity of, after intravitreal immunization with bovine gamma globulin and ovalbumin (Hall), 775

in tears following intranasal vaccination with inactivated virus (Knopf et al.), 751, 760

Antigenic challenge, specific, and lymph node allograft, ocular response following (Prendergast and Franklin), 695

Applanation and Schiøtz tonometer standardizations for owl monkey eye with new technique for measuring episcleral venous pressure (Mims and Holland), 190

Aqueous, cation changes in, during induction of acute reversible lens opacity in hamster (Peterson), 147

fibrinolysin, effect of salicylates on (Smith and Christensen), 266

humor of alloxan-diabetic rabbits, sorbitol pathway in ciliary body in relation to accumulation of amino acids in (Reddy et al.), 870

dynamics, effects of topically administered bradykinin, amine releasers, and pargyline on (Zeller et al.), 274

Aqueous humor—Cont'd
measurements in young normal subjects (Kupfer and Ross), 518

measurements in young normal subjects using acetazolamide and L-epinephrine (Kupfer, Gaasterland, and Ross), 523

outflow in enucleated monkey eyes, influence of trabeculotomy and intraocular pressure on (Ellingsen and Grant), 705

and pressure, relationship in enucleated human eyes (Ellingsen and Grant), 430

sodium concentration and lens changes in corneal exposure (Bronson and Lazar), 144

Argon laser phototherapy of Pseudomonas corneal ulcers (Fromer and L'Esperance), 1

and ruby retinal damage thresholds, comparative study of (Frisch et al.), 911

Ascorbic acid and hexosemonophosphate shunt in corneal epithelium, oxidation-reduction reactions involving (Anderson and Spector), 41

B

Ballistic assessment of eye protector lens materials (Wigglesworth), 985

Beta radiation inhibition of corneal healing; tensile strength and ultrastructure change (Pei and Rhodin), 811

Bioelectric potentials of crystalline lens, effect of cationic compositions of bathing medium (Kinsey and McGrady), 282

Blood flow, ocular, measurements in dogs by photoelectric plethysmography (Christensen et al.), 247

Book reviews, 87, 166, 236, 302, 374, 470, 638, 810, 924

*January, pp. 1-88; February, pp. 89-166; March, pp. 167-236; April, pp. 237-302; May, pp. 303-374; June, pp. 375-470; July, pp. 471-544; August, pp. 545-638; September, pp. 639-732; October, pp. 733-810; November, pp. 811-924; December, pp. 925-1026.

Bovine gamma globulin and ovalbumin, specificity of antibody formation after intravitreal immunization with (Hall), 775

Bradykinin, effect on aqueous humor dynamics (Zeller et al.), 274

Bunsen-Roscoe law for human eye at high energy levels, electroretinographic evaluation of (Rosenblum), 904

Burns, acid and alkali, in rabbits, ocular hypertensive response following (Chiang, Moorman, and Thomas), 270

threshold, retinal, role of body temperature in definition of (Ward and Bruce), 955

C

Capsulovitreotomy, technique for intracapsular lens extraction in cats (Kramer, Weiter, and Farkas), 367

Cataracts, analysis of visual-evoked response by Synchronous Detector techniques (Fricker), 340

diabetic, alterations in, in glycosidases of crystalline lens (Carlin and Cotlier), 898

hereditary, in mice, mechanism of development of (Iwata and Kinoshita), 504

Cation changes in lens and aqueous during induction of acute reversible lens opacity in hamster (Peterson), 147

Cell proliferation in rat lens epithelium, isoproterenol-induced changes of (von Sallmann and Grimes), 943

Chemical sympathectomy, anterior segment, by 6-hydroxy-dopamine, effect on intraocular pressure and outflow facility (Holland and Mims), 120

Chorioretinal diffusion of peroxidase before and after photocoagulation (Peyman, Spitznas, and Straatsma), 489

Chloroquine, acute toxic effects of, on cat retina: Ultrastructural changes, (Smith and Berson), 237

Ciliary body–iris of cat eye, vasoconstriction produced in, by stimulation of local ganglion-like receptors (Macri), 581

sorbitol pathway in, in relation to accumulation of amino acids in aqueous humor of alloxan-diabetic rabbits (Reddy et al.), 870

epithelium and ciliary zonule, fine structure of (Raviola), 851

zone and ciliary epithelium, fine structure of (Raviola), 851

Collagenase, corneal, characterization and inhibition of (Hook et al.), 496

ulcers (Brown), 203

Color vision, approach through cone pigments (Rushton), 311

Cone pigments, approach to color vision (Rushton), 311

Conjunctiva, ultrastructural observations in mucolipidosis II (Kenyon and Sensenbrenner), 555

ultrastructure in mucolipidosis III (pseudo-Hurler polydystrophy) (Quigley and Goldberg), 568

Conjunctivitis, vaccinia, experimental, role of tear and serum antibody in (Knopf et al.), 706

Cornea, anterior portion of, Fuchs' combined dystrophy, electron microscopic studies on (Iwamoto and DeVoe), 29

boundary surface, as observed by Schiøtz tonometer (Moses), 534

and footplate of tonometer, friction between (Moses and Grodzki), 589

posterior portion of, Fuchs' combined dystrophy, electron microscopic studies on (Iwamoto and DeVoe), 9

rabbit, angular dependence of light scattered from (Feuk and McQueen), 294

Cornea—Cont'd

resistance to deformation, as observed by Schiøtz tonometer (Moses and Grodzki), 539

Corneal collagenase, characterization and inhibition of (Hook et al.), 496

edema, hereditary, electron microscopic study of (Kanai et al.), 89

further electron microscopic study of (Kanai and Kaufman), 545

endothelium, cat, in vitro, water permeability of (Rhee et al.), 288

epithelium, function of, in health and disease (Dohlman), 383

mouse, electron microscopic study of development of (Pei and Rhodin), 811

oxidation-reduction reactions involving ascorbic acid and hexosemonophosphate shunt in (Anderson and Spector), 41

exposure, aqueous sodium concentration and lens changes in (Bronson and Lazar), 144

graft rejection, immune factors in (Elliott), 216

stroma during early rejection, ultramicroscopic changes in (Kanai and Polack), 415

healing, beta radiation inhibition of; tensile strength and ultrastructure change (Pei and Rhodin), 811

infection and immunity, symposium on (Association for Research in Vision and Ophthalmology and National Society for Prevention of Blindness), 203-234

tissue, cryopreserved, experimental rehydration of (Edelhauser et al.), 100

ulcers and collagenase (Brown), 203

Pseudomonas, argon laser phototherapy of (Fromer and L'Esperance), 1

vascularization in experimental uveitis and graft rejection (Inomata et al.), 840

XUM

Cryopreserved corneal tissue, exerimental rehydration of (Edelhauser et al.), 100
Crystallin, alpha, structure of, age-dependent changes in (Spector et al.), 677
Crystalline lens, bioelectric potentials as affected by cationic compositions of bathing medium (Kinsey and McGrady), 282
glycosidases of (Carlin and Cotlier), 887, 898
studies on; kinetics of thallium transport in relation to that of alkali metal cations (Kinsey, McLean, and Parker), 932

D

Deutan and protan heterozygosity, phenotypic diagnosis of (Piantanida), 979
Dexamethasone testing in prison inmates (Kolker et al.), 198
Diabetic (alloxan) rabbits, sorbitol pathway in ciliary body in relation to accumulation of amino acids in aqueous humor on (Reddy et al.), 870
rat, uridine diphosphoglucose -glycogen glucosyltransferase activity in retina of (Meyers and Newell), 453
cataracts, alterations in, in glycosidases of crystalline lens (Carlin and Cotlier), 898
Diphosphoglucose, uridine-glycogen glucosyltransferase activity in retina of alloxan-diabetic rat (Meyers and Newell), 453
Distensibility measurements of rabbit eye (Tittel and Richards), 800
Dohlman, Claes H., publications of, 378
Dopamine, H3, autoradiographic localization of, in retina (Kramer, Potts, and Mangnall), 617
retinal neurotransmitter; autoradiographic localization of H3-dopamine in retina (Kramer, Potts, and Mangnall), 617
Dopamine, retinal neurotransmitter—Cont'd
retinal uptake, storage, and light-stimulated release in vivo (Kramer), 438
Dystrophic rat, outer segment production and removal in degenerating retina of (Herron, Riegel, and Rubin), 54
Dystrophy, Fuchs' combined, anterior portion of cornea, electron microscopic studies on (Iwamoto and DeVoe), 29
posterior portion of cornea, electron microscopic studies on (Iwamoto and DeVoe), 9

E

Edema, corneal, hereditary, electron microscopic study of (Kanai et al.), 89
further electron microscopic study of (Kanai and Kaufman), 545
Electrical potential difference and short-circuit current across lens of toad *Bufo marinus*, effects of some metabolic inhibitors on (Bentley and Candia), 672
and psychophysical responses of human visual system to periodic variation of luminance (Sokol and Riggs), 171
Electron microscopic study of development of mouse corneal epithelium (Pei and Rhodin), 811
on Fuchs' combined dystrophy, anterior portion of cornea (Iwamoto and DeVoe), 29
posterior portion of cornea (Iwamoto and DeVoe), 9
further, of hereditary corneal edema (Kanai and Kaufman), 545
of hereditary corneal edema (Kanai et al.), 89
on pupillary membrane: fine structures of white strands of disappearing stage of (Matsuo and Smelser), 108
scanning, on iridocorneal angle in human eyes (Hansson and Jerndal), 252
Electron microscopic study—Cont'd
transmission and scanning, of morphology of experimental vaccinial superficial punctate keratitis (Matas et al.), 348
Electroretinographic analysis, Synchronous Detector techniques for, rod function evaluation by (Fricker and Sanders), 639
evaluation of Bunsen-Roscoe law for human eye at high energy levels (Rosenblum), 904
studies in patients with retinitis pigmentosa, application of Synchronous Detector techniques for (Fricker), 329
Emmetropia, ultrasonographic assessment of implant lens required to produce, after implantation (Leary), 745
Endothelium, cat corneal, in vitro, water permeability of (Rhee et al.), 288
Endothelial role in thrombosis: induced retinal vasculitis in living extracorporeal eye (Tazawa et al.), 481
Energy levels, high, human eye at, electroretinographic evaluation of Bunsen-Roscoe law for (Rosenblum), 904
Enzymology of refractory media of eye: effects of topically administered bradykinin, amine releasers, and pargyline on aqueous humor dynamics (Zeller et al.), 274
L-Epinephrine, measurements of aqueous humor in young normal subjects using (Kupfer, Gaasterland, and Ross), 523
Episcleral venous pressure, new technique for measuring (Mims and Holland), 190
Epithelium, ciliary, and ciliary zonule, fine structure of (Raviola), 851
corneal, function of, in health and disease (Dohlman), 383

Epithelium, corneal—Cont'd
mouse, electron microscopic study of development of (Pei and Rhodin), 811
oxidation-reduction reactions involving ascorbic acid and hexosemonophosphate shunt in (Anderson and Spector), 41
retinal pigment, acid hydrolases of (Berman), 64
Extraocular recti muscles of cat, coordination of (Perryman and Breinin), 78
Eye, human, at high energy levels, electroretinographic evaluation of Bunsen-Roscoe law for (Rosenblum), 904
motion, horizontal, dynamic measurements: acceleration and velocity matrices (Fricker), 724
protector lens materials, ballistic assessment of (Wigglesworth), 985
rabbit, distensibility measurements of (Tittel and Richards), 800
and thallous ion (Potts and Au), 925

F

Far-field radiation pattern, human foveal (Enoch and Scandrett), 167
Fatty acid deficiency, essential, effect on fatty acid composition, morphology, and electroretinographic response of retina (Futterman, Downer, and Hendrickson), 151
Fibrinolysin, aqueous, effect of salicylates on (Smith and Christensen), 266
Fine structure of ciliary zonule and ciliary epithelium (Raviola), 851
Florenal in treatment of herpesvirus and adenovirus eye diseases (Maichuk), 408
Footplate of Schiøtz tonometer and cornea, friction between (Moses and Grodzki), 589
Foveal far-field radiation pattern, human (Enoch and Scandrett), 167
Friedenwald Award in Ophthalthalmology, presentation of, to Dr. Claes H. Dohlman (Kinoshita), 376
remarks on acceptance (Dohlman), 377
Memorial Lecture: Function of corneal epithelium in health and disease (Dohlman), 383
Fuchs' combined dystrophy, anterior portion of cornea, electron microscopic studies on (Iwamoto and DeVoe), 29
posterior portion of cornea, electron microscopic studies on (Iwamoto and DeVoe), 9

G

Gamma globulin, bovine, and ovalbumin, specificity of antibody formation after intravitreal immunization with (Hall), 775
Ganglion-like receptors, local, stimulation of, vasoconstriction of iris–ciliary body of cat eye produced by (Macri), 581
Globulin, bovine gamma, and ovalbumin, specificity of antibody formation after intravitreal immunization with (Hall), 775
Glucosyltransferase, glycogen–uridine diphosphoglucose activity in retina of alloxan-diabetic rat (Meyers and Newell), 453
Glycogen glucosyltransferase–uridine diphosphoglucose activity in retina of alloxan-diabetic rat (Meyers and Newell), 453
Glycosidases of crystalline lens (Carlin and Cotlier), 887, 898
Graft rejection, corneal, immune factors in (Elliott), 216
vascularization in experimental uveitis and (Inomata et al.), 840
stroma, corneal, during early rejection, ultramicroscopic changes in (Kanai and Polack), 415

H

Hereditary cataract in mice, mechanism of development of (Iwata and Kinoshita), 504
corneal edema, electron microscopic study of (Kanai et al.), 89
dominant optic atrophy and congenital tritanopia, further studies supporting identity of (Krill, Smith, and Pokorny), 457
Herpes simplex, ocular (Brown), 210
Herpesvirus and adenovirus eye diseases, Florenal in treatment (Maichuk), 408
Heterozygosity, protan and deutan, phenotypic diagnosis of (Piantanida), 979
Hexosemonophosphate shunt and ascorbic acid in corneal epithelium, oxidation-reduction reactions involving (Anderson and Spector), 41
Humor, aqueous, measurements in young normal subjects (Kupfer and Ross), 518
using acetazolamide and L-epinephrine (Kupfer, Gaasterland, and Ross), 523
Hydrolases, acid, of retinal pigment epithelium (Berman), 64
6-Hydroxy-dopamine, anterior segment chemical sympathectomy by, effect on intraocular pressure and outflow facility (Holland and Mims), 120
Hyperbaric oxygenation, effect of, on retinal ischemia (Flower and Patz), 605
Hypertensive response, ocular, following acid and alkali burns in rabbits (Chiang, Moorman, and Thomas), 270
Hypoxia, effect on visual function, psychophysical studies (Ernest and Krill), 323

I

Immune factors in corneal graft rejection (Elliott), 216
Immunity, local adoptive, in eye (Prendergast and Franklin), 695

XUM

Immunization, intravitreal, with bovine gamma globulin and ovalbumin, specificity of antibody formation after (Hall), 775
Impact resistance of simulated safety lenses, effect of thermal toughening on (Wigglesworth), 992
Implant lens, ultrasonographic assessment of, required to produce emmetropia after implantation (Leary), 745
Intraocular pressure and outflow facility, effect on, of anterior segment chemical sympathectomy by 6-hydroxy-dopamine (Holland and Mims), 120
and trabeculotomy, influence of, on aqueous outflow in enucleated monkey eyes (Ellingsen and Grant), 705
Iridocorneal angle in human eyes, scanning electron microscopic studies on (Hansson and Jerndal), 252
Iris–ciliary body of cat eye, vasoconstriction produced in, by stimulation of local ganglion-like receptors (Macri), 581
rat, development of (Imaizumi and Kuwabara), 733
Isoproterenol-induced changes of cell proliferation in rat lens epithelium (von Sallmann and Grimes), 943

K

Keratitis, punctate, experimental vaccinial superficial morphology of, scanning and transmission electron microscopic study (Matas et al.), 348

L

Laser photocoagulation, rabbit visual potentials after (Hempel), 639
phototherapy, argon, of Pseudomonas corneal ulcers (Fromer and L'Esperance), 1
Lens aldose reductase, activators and inhibitors of (Jedziniak and Kinoshita), 357
Lens—Cont'd
cation changes in, during induction of acute reversible lens opacity in hamster (Peterson), 147
changes and aqueous sodium concentration in corneal exposure (Bronson and Lazar), 144
crystalline, bioelectric potentials as affected by cationic compositions of bathing medium, (Kinsey and McGrady), 282
glycosidases of (Carlin and Cotlier), 887, 989
extraction, intracapsular, in cats, capsulovitreotomy as technique for (Kramer, Weiter, and Farkas), 367
implant, ultrasonographic assessment of, required to produce emmetropia after implantation (Leary), 745
materials, eye protector, ballistic assessment of (Wigglesworth), 985
opacity, acute reversible, in hamster, cation changes in lens and aqueous during induction of (Peterson), 147
rat, epithelium, isoproterenol-induced changes of cell proliferation in (von Sallmann and Grimes), 943
safety, simulated, impact resistance of, effect of thermal toughening on (Wigglesworth), 992
Light intensity, sinusoidal variations in, retinal response to, at very low frequencies (Levett), 971
scattered from rabbit corneas, angular dependence of (Feuk and McQueen), 294
stimulus, patterned, visual-evoked response produced by (Uenoyama), 664
Luminance, periodic variation of, electrical and psychophysical responses of human visual system to (Sokol and Riggs), 171
Lymph node allograft and specific antigenic challenge, ocular response following (Prendergast and Franklin), 695
Lymphocyte-stimulating activity of ocular tissues in sympathetic ophthalmia (Marak et al.), 770

M

Metabolic inhibitors, effects of some, on electrical potential difference and short-circuit current across lens of toad *Bufo marinus* (Bentley and Candia), 672
Mucolipidosis II (I-cell disease), ultrastructural observations of conjunctiva and skin (Kenyon and Sensenbrenner), 555
III (pseudo-Hurler polydystrophy), conjunctival ultrastructure in (Quigley and Goldberg), 568
Mydriasis and ptosis, "steroid-induced" (Newsome et al.), 424

N

Nerve, optic, rabbit, in vitro, amino acid transport by (Cotlier et al.), 876
Nightblindness, congenital stationary, photopic abnormalities in (Krill and Martin), 625

O

Ocular response following lymph node allograft and specific antigenic challenge (Prendergast and Franklin), 695
tissues, lymphocyte-stimulating activity of, in sympathetic ophthalmia (Marak et al.), 770
Opacity, lens, acute reversible, in hamster, cation changes in lens and aqueous during induction of (Peterson), 147
Ophthalmia, sympathetic, lymphocyte-stimulating activity of ocular tissues in (Marak et al.), 770
Optic atrophy, hereditary dominant, and congenital tritanopia, further studies supporting identity of (Krill, Smith, and Pokorny), 457

Optic—Cont'd
nerve, rabbit, in vitro, amino acid transport by (Cotlier et al.), 876
Outer segment production and removal in degenerating retina of dystrophic rat (Herron, Riegel, and Rubin), 54
Outflow facility in human eyes, development of (Kupfer and Ross), 513
and intraocular pressure, effect on, of anterior segment chemical sympathectomy by 6-hydroxy-dopamine (Holland and Mims), 120
Ovalbumin and bovine gamma globulin, specificity of antibody formation after intravitreal immunization with (Hall), 775
Oxidation-reduction reactions involving ascorbic acid and hexosemonophosphate shunt in corneal epithelium (Anderson and Spector), 41
Oxygenation, hyperbaric, effect of, on retinal ischemia (Flower and Patz), 605

P

Pargyline, effect on aqueous humor dynamics (Zeller et al.), 274
Perioxidase, chorioretinal diffusion of, before and after photocoagulation (Peyman, Spitznas, and Straatsma), 489
diffusion in normal and photocoagulated retina (Peyman, Spitznas, and Straatsma), 181
pH, effect of, in various areas of crystalline lens and subcellular fractions (Carlin and Cotlier), 887
Phenotypic diagnosis of protan and deutan heterozygosity (Piantanida), 979
Photocoagulated and normal retina, peroxidase diffusion in (Peyman, Spitznas, and Straatsma), 181
Photocoagulation, chorioretinal diffusion of peroxidase before and after (Peyman, Spitznas, and Straatsma), 489
Photocoagulation—Cont'd
laser, rabbit visual potentials after (Hempel), 639
Photoelectric plethysmography. Ocular blood flow measurements in dogs (Christensen et al.), 247
Photopic abnormalities in congenital stationary nightblindness (Krill and Martin), 625
Photoreceptors, neighboring, analysis of retinal receptor orientation, angular relationship of (Laties and Enoch), 64
Phototherapy, argon laser, of Pseudomonas corneal ulcers (Fromer and L'Esperance), 1
Pigments, cone, approach to color vision through (Rushton), 311
epithelium, retinal, acid hydrolases of (Berman), 64
Plethysmography, photoelectric, ocular blood flow measurements in dogs (Christensen et al.), 247
Polydystrophy, pseudo-Hurler (mucolipidosis III), conjunctival ultrastructure in (Quigley and Goldberg), 568
Polyinosinic:polycytidilic acid, enhancement of tear antibody production by use of (Knopf et al.), 751
Pressure and aqueous outflow, relationship of, in enucleated human eyes (Ellingsen and Grant), 430
Proctor Medal of A.R.V.O., presentation of, to W. A. H. Rushton (Riggs), 304
Protan and deutan heterozygosity, phenotypic diagnosis of (Piantanida), 979
Pseudomonas corneal ulcers, argon laser phototherapy of (Fromer and L'Esperance), 1
Psychophysical and electrical responses of human visual system to periodic variation of luminance (Sokol and Riggs), 171
studies on effect of hypoxia on visual function (Ernest and Krill), 323
Psychophysical—Cont'd
tests, predictions for, in analysis of retinal receptor orientation (Enoch and Laties), 959
Ptosis and mydriasis, "steroid-induced" (Newsome et al.), 424
Publications of W. A. H. Rushton, 306
Punctate keratitis, experimental vaccinial superficial, morphology of, scanning and transmission electron microscopic study (Matas et al.), 348
Pupillary membrane: fine structures of white strands of disappearing stage of, electron microscopic studies on (Edelhauser et al.), 108

R

Radiation, beta, inhibition of corneal healing; tensile strength and ultrastructure change (Pei and Rhodin), 811
pattern, human foveal far-field (Enoch and Scandrett), 167
Rat iris, development of (Imaizumi and Kuwabara), 733
Receptor, retinal, orientation, analysis of angular relationship of neighboring photoreceptors (Laties and Enoch), 64
predictions for psychophysical tests (Enoch and Laties), 959
Recti muscles, extraocular, of cat, coordination of (Perryman and Breinin), 78
Refractory media of eye, enzymology of: effects of topically administered bradykinin, amine releasers, and pargyline on aqueous humor dynamics (Zeller et al.), 274
Rehydration, experimental, of cryopreserved corneal tissue (Edelhauser et al.), 100
Rejection, early, ultramicroscopic changes in corneal graft stroma during (Kanai and Polack), 415

XUM

Retina of alloxan-diabetic rat, uridine diphosphoglucose–glycogen glucosyltransferase activity in (Meyers and Newell), 453
autoradiographic localization of H3-dopamine in (Kramer, Potts and Mangnall), 617
cat: Ultrastructural changes, acute toxic effects of chloroquine on (Smith and Berson), 237
degenerating, of dystrophic rat, outer segment production and removal in (Herron, Riegel, and Rubin), 54
effect of essential fatty acid deficiency on fatty acid composition, morphology, and electroretinographic response of (Futterman, Downer, and Hendrickson), 151
normal and photocoagulated, peroxidase diffusion in (Peyman, Spitznas, and Straatsma), 181
Retinal burn threshold, role of body temperature in definition of (Ward and Bruce), 955
collateral vessel formation (Klein et al.), 472
damage thresholds, argon and ruby, comparative study of (Frisch et al.), 911
ischemia, effect on, of hyperbaric oxygenation (Flower and Patz), 605
pigment epithelium, acid hydrolases of (Berman), 64
receptor orientation, analysis of angular relationship of neighboring photoreceptors (Laties and Enoch), 64
predictions for psychophysical tests (Enoch and Laties), 959
response to sinusoidal variations in light intensity at very low frequencies (Levett), 971
uptake, storage, and light-stimulated release of H3-dopamine in vivo (Kramer), 438
vasculitis, induced, in living extracorporeal eye (Tazawa et al.), 481
Retinitis pigmentosa in abetalipoproteinemia, effects of vitamin A (Gouras, Carr, and Gunkel), 784
application of Synchronous Detector techniques for electroretinographic studies in patients with (Fricker), 329
RNA synthesis in rod cell of rat (Koenig), 794
Rod cell of rat, RNA synthesis in (Koenig), 794
function evaluation by Synchronous Detector techniques for electroretinographic analysis (Fricker and Sanders), 639
Ruby and argon retinal damage thresholds, comparative study of (Frisch et al.), 911

S

Safety lenses, simulated, impact resistance of, effect of thermal toughening on (Wigglesworth), 992
Salicylates, effect on aqueous fibrinolysin (Smith and Christensen), 266
Scanning electron microscopic studies on development of iridocorneal angle in human eyes (Hansson and Jerndal), 252
and transmission electron microscopic study of morphology of experimental vaccinial superficial punctate keratitis (Matas et al.), 348
Schiøtz and applanation tonometer standardizations for owl monkey eye with new technique for measuring episcleral venous pressure (Mims and Holland), 190
tonometer, theory and calibration of. I. Boundary surface of cornea (Moses), 534
II. Resistance of cornea to deformation (Moses and Grodzki), 539
III. Friction between tonometer footplate and cornea (Moses and Grodzki), 589
Schiøtz tonometer, theory and calibration of—Cont'd
IV. Mathematical model of Schiøtz tonometry: scale reading and tonometric pressure (Moses), 592
V. Mathematical model of Schiøtz tonometry: volume of indentation (Moses), 601
VI. Experimental results of tonometric measurements: scale reading versus tonometric pressure (Moses and Grodzki), 710
VII. Experimental results of tonometric measurements: scale reading versus indentation volume (Moses and Grodzki), 716
tonometry, mathematical model of: scale reading and tonometric pressure (Moses), 592
volume of indentation (Moses), 601
Sclerocornea, fine structure of (Kanai et al.), 687
Serum and tear antibody in experimental vaccinia conjunctivitis, role of (Knopf et al.), 760
Sinusoidal variations in light intensity at very low frequencies, retinal response to (Levett), 971
Skin, ultrastructural observations in mucolipidosis II (Kenyon and Sensenbrenner), 555
Sodium concentration of aqueous and lens changes in corneal exposure (Bronson and Lazar), 144
Sorbitol pathway in ciliary body in relation to accumulation of amino acids in aqueous humor of alloxan-diabetic rabbits (Reddy et al.), 870
Strands, white, of disappearing stage of pupillary membrane, fine structure of, electron microscopic studies on (Edelhauser et al.), 108
"Steroid-induced" mydriasis and ptosis (Newsome et al.), 424

Stroma, corneal graft, during early rejection, ultramicroscopic changes in (Kanai and Polack), 415
Sympathectomy, chemical, anterior segment, by 6-hydroxy-dopamine, effect on intraocular pressure and outflow facility (Holland and Mims), 120
Synchronous Detector techniques, analysis of visual evoked response by, in patients with cataracts (Fricker), 340
for electroretinographic analysis, rod function evaluation by (Fricker and Sanders), 639
studies in patients with retinitis pigmentosa, application of (Fricker), 329

T

Tears, antibody in, following intranasal vaccination with inactivated virus (Knopf et al.), 751, 760
Temperature, body, role of, in definition of retinal burn threshold (Ward and Bruce), 955
Thallium transport, kinetics of, in relation to that of alkali metal cations (Kinsey, McLean, and Parker), 932
Thallous ion and eye (Potts and Au), 925
Thermal toughening, effect of, on impact resistance of simulated safety lenses (Wigglesworth), 992
Thrombosis, endothelial role in: induced retinal vasculitis in living extracorporeal eye (Tazawa et al.), 481
Tonometer, applanation and Schiøtz, standardizations for owl monkey eye with new technique for measuring episcleral venous pressure (Mims and Holland), 190
Schiøtz (see under Schiøtz)
Tonometric measurements, experimental results: scale reading versus indentation volume (Moses and Grodzki), 716
Tonometric measurements, experimental results—Cont'd
scale reading versus tonometric pressure (Moses and Grodzki), 710
pressure and scale reading in mathematical model of Schiøtz tonometry (Moses), 592
Trabeculotomy and intraocular pressure, influence of, on aqueous outflow in enucleated monkey eyes (Ellingsen and Grant), 705
Transmission and scanning electron microscopic study of morphology of experimental vaccinial superficial punctate keratitis (Matas et al.), 348
Tritanopia, congenital, and hereditary dominant optic atrophy, further studies supporting identity of (Krill, Smith, and Pokorny), 457

U

Ulcers, corneal, and collagenase (Brown), 203
Pseudomonas, argon laser phototherapy of (Fromer and L'Esperance), 1
Ultramicroscopic changes in corneal graft stroma during early rejection (Kanai and Polack), 415
Ultrasonographic assessment of implant lens required to produce emmetropia after implantation (Leary), 745
Ultrastructural changes, acute toxic effects of chloroquine on cat retina (Smith and Berson), 237
observations of conjunctiva and skin in mucolipidosis II (I-cell disease) (Kenyon and Sensenbrenner), 555
Ultrastructure change in beta radiation inhibition of corneal healing (Pei and Rhodin), 811
conjunctival, in mucolipidosis III (pseudo-Hurler polydystrophy) (Quigley and Goldberg), 568
Uridine diphosphoglucose–glycogen glucosyltransferase activity in retina of alloxan-diabetic rat (Meyers and Newell), 453
Uveitis, experimental chronic (Williams et al.), 948
and graft rejection, corneal vascularization in (Inomata et al.), 840

V

Vaccination, intranasal, with inactivated virus, antibody in tears following (Knopf et al.), 751, 760
Vaccinia conjunctivitis, experimental, role of tear and serum antibody in (Knopf et al.), 760
Vaccinial superficial punctate keratitis, morphology of, scanning and transmission electron microscopic study (Matas et al.), 348
Vasculitis, retinal, induced, in living extracorporeal eye (Tazawa et al.), 481
Vasoconstriction produced in iris–ciliary body of cat eye by stimulation of local ganglion-like receptors (Macri), 581
Venous pressure, episcleral, new technique for measuring (Mims and Holland), 190
Vessel, retinal collateral, formation (Klein et al.), 471
Virus, inactivated, antibody in tears following intranasal vaccination with (Knopf et al.), 751, 760
Visual evoked response, analysis of, by Synchronous Detector techniques in patients with cataracts (Fricker), 340
produced by patterned light stimulus (Uenoyama), 664
function, effect of hypoxia on, psychophysical studies (Ernest and Krill), 323
potentials, rabbit, after laser photocoagulation (Hempel), 639

XUM

Vitamin A, effects of, on retinitis pigmentosa in abetalipoproteinemia (Gouras, Carr, and Gunkel), 784

W

Water permeability of cat corneal endothelium in vitro (Rhee et al.), 288

Z

Zonule, ciliary, and ciliary epithelium, fine structure of (Raviola), 851
